

## CHEMICAL TOILETS

### Applications

Chemical toilets are ideal for applications where a temporary toilet cannot be connected to the municipal sewerage system or in rough construction environments where high volume usage of connected toilets causes the sewerage to block.

They are also very popular for providing extra short term toilet facilities at functions such as sport events.

### Specifications

Chemical toilets have a minimum capacity of 100 litres and are available in the following service options:

Non flush - 2 services per month

Non flush - 4 services per month

Flushable function toilet

### Operation and Basic Maintenance tips

All chemical toilets are delivered on site and serviced according to the appropriate service option.

### Recommended usage is:

1 two service toilet for up to five workers on site;

1 two service toilet for every 10 workers on site;

Flushable function toilet

### Do's and Don'ts

For services, access with a seven ton truck is required during normal business hours. Please do not move toilets, obstruct access or lock toilets.

Do not over-utilize toilets, please stay within the utilization guidelines provided above.

## SHEDS

### Applications

Corrugated iron sheds are ideal for temporary storage and accommodation on construction sites.

### Operation and Maintenance

On site maintenance to sheds are done on client request or when required.

### Specifications

We offer 3 sizes, namely:

- 2.1m x 2.4m optional window
- 2.1m x 3.6m with window
- 2.1m x 4.8m with window

### Do's and Don'ts

It is the client's responsibility to safely secure the shed to the ground to prevent wind damage.

Please do not move sheds, contact Coastal Toilet and Hut if a shed needs to be moved.

Please ensure that a shed has been emptied and that it is accessible by motor vehicle before requesting collection.
